

SaeboFlex / SaeboReach

Saebo's functional dynamic orthoses are specifically designed for individuals suffering from a neurological injury such as a stroke, head injury and incomplete spinal cord injury.

Benefits

- Maintains the patient's involved arm and hand in a functional position.
- Offers a dynamic component that assists with thumb and finger extension so grasp and release tasks can be accomplished.
- Offers a dynamic elbow extension system to facilitate functional reaching.
- With the ability to perform grasp and release activities, patients can perform highly repetitive, task-oriented arm training. Evidence based research supports this training as critical to recovery.

SaeboFlex

SaeboReach

The **SaeboFlex** and **SaeboReach** allow patients to immediately begin using their arm and hand in therapy and at home.
